WHO WE ARE

A meme with self-esteem.

By holding PolyDoge, you are taking ownership of a futuristic Canis familiaris cryptographic digital asset rooted in culturally relevant memology and built on Polygon's powerful layer-2 blockchain.

PolyDoge is not only the oldest community token on the Polygon ecosystem, but also a first, visionary attempt at something never before seen in the cryptoverse - to bridge the gap between mass-appeal meme coin and deflationary utility token.

EVENTS & METAVERSE

PolyDoge hosts 3D virtual events on Gamerjibe to promote itself and our partner companies. We are constantly innovating and exploring new ways to help bridge the gap between crypto and the real world.

GAMING & eSPORTS

We are creating a full ecosystem of games that leverage PolyDoge as an in-game token for rewards and payments. We will also focus on eSports by partnering with well-known brands and players.

NFTs & DEDICATED ARTISTS

Our core team of artists is designing NFTs that will be gifted to the community via airdrops. These NFTs will have utility in the world of PolyDoge and give additional perks to their holders over time.

DeFi & YIELD FARMING

PolyDoge has become the staple of all new DeFi farms by offering the juiciest staking and liquidity pooling opportunities on Polygon. Our extensive network will ensure we always secure the best deals for our community.

STRONG COMMUNITY

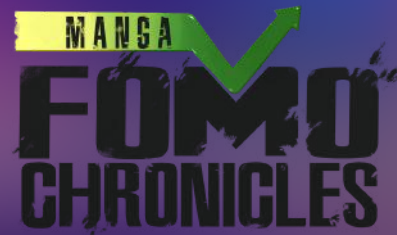

Our community is the beating heart of PolyDoge. We strive to create a fun and vibrant hangout, feed it with content created by our influencers, offer quality merch and tons of giveaways, events and gaming tournaments.
